# **Keysight 2-Port and 4-Port Broadband Network Analyzer**

N5290A 500 Hz to 110 GHz

(for synthesizer revision 7)

## **Documentation Warranty**

THE MATERIAL CONTAINED IN THIS DOCUMENT IS PROVIDED "AS IS," AND IS SUBJECT TO BEING CHANGED, WITHOUT NOTICE, IN FUTURE EDITIONS. FURTHER, TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, KEYSIGHT DISCLAIMS ALL WARRANTIES, EITHER EXPRESS OR IMPLIED WITH REGARD TO THIS MANUAL AND ANY INFORMATION CONTAINED HEREIN, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. KEYSIGHT SHALL NOT BE LIABLE FOR ERRORS OR FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH THE FURNISHING, USE, OR PERFORMANCE OF THIS DOCUMENT OR ANY INFORMATION CONTAINED HEREIN. SHOULD KEYSIGHT AND THE USER HAVE A SEPARATE WRITTEN AGREEMENT WITH WARRANTY TERMS COVERING THE MATERIAL IN THIS DOCUMENT THAT CONFLICT WITH THESE TERMS, THE WARRANTY TERMS IN THE SEPARATE AGREEMENT WILL CONTROL.

## **U.S. Government Rights**

U.S. Government Rights. The Software is "commercial computer software," as defined by Federal Acquisition Regulation ("FAR") 2.101. Pursuant to FAR 12.212 and 27.405-3 and Department of Defense FAR Supplement ("DFARS") 227.7202, the U.S. government acquires commercial computer software under the same terms by which the software is customarily provided to the public. Accordingly, Keysight provides the Software to U.S. government customers under its standard commercial license, which is embodied in its End User License Agreement (EULA), a copy of which can be found at <http://www.keysight.com/find/sweula>. The license set forth in the EULA represents the exclusive authority by which the U.S. government may use, modify, distribute, or disclose the Software. The EULA and the license set forth therein, does not require or permit, among other things, that Keysight: (1) Furnish technical information related to commercial computer software or commercial computer software documentation that is not customarily provided to the public; or (2) Relinquish to, or otherwise provide, the government rights in excess of these rights customarily provided to the public to use, modify, reproduce, release, perform, display, or disclose commercial computer software or commercial computer software documentation. No additional government requirements beyond those set forth in the EULA shall apply, except to the extent that those terms, rights, or licenses are explicitly required from all providers of commercial computer software pursuant to the FAR and the DFARS and are set forth specifically in writing elsewhere in the EULA. Keysight shall be under no obligation to update, revise or otherwise modify the Software. With respect to any technical data as defined by FAR 2.101, pursuant to FAR 12.211 and 27.404.2 and DFARS 227.7102, the U.S. government acquires no greater than Limited Rights as defined in FAR 27.401 or DFAR 227.7103-5 (c), as applicable in any technical data.

## N5290A System Options

This is a complete list of the technical specifications for the N5290A Broadband millimeter wave Network Analyzer with the following options (see block diagrams at the end of this document):

### Option 201

- N5222B 2-port PNA with option 205 and 020
- N5292A Millimeter wave test set controller with options 200 and 222
- 2 N5293AX03 Frequency extenders

### Option 202

- N5227B 2-port PNA with option 205 and 020
- N5292A Millimeter wave test set controller with options 200 and 224
- 2 N5293AX03 Frequency extenders

### Option 401

- N5242B 4-port PNA-X with option 425 and 020
- N5292A Millimeter wave test set controller with options 400 and 442
- 4 N5293AX03 Frequency extenders

### Option 402

- N5242B 4-port PNA-X with options 425, 029, and 020
- N5292A Millimeter wave test set with options 400 and 442
- 4 N5293AX03 Frequency extenders

### Option 403

- N5247B 4-port PNA-X with options 425, 029, and 020
- N5292A Millimeter wave test set with options 400 and 444
- 4 N5293AX03 Frequency extenders

## Instrument Options

**Option 020**, adds IF inputs on the rear panel.

**Option 029**, adds hardware and firmware for high-accuracy noise figure measurements.

**Option 205**, adds front-panel jumpers, R1 receiver switch, and Low Frequency Extension (LFE) hardware.

**Option 425**, adds source and receiver attenuators, internal second source, combiner, mechanical switches, low frequency extension (LFE) hardware, and dedicated 26.5 GHz noise receiver.

For Spectrum Analyzer option information, please refer to '*Keysight Spectrum Analyzer Option (090/S93090xA) for PNA/PNA-L/PNA-X/N5290A/N5291A*'.

This document is written for the N5290A with five options (configurations) as given in the previous page. Broadband network analyzers can also be configured with other PNA-X models with other options and one of the frequency extenders as given in the section, “Configuring Broadband Using Separate System Components” in the N5290A/91A configuration guide, 5992-2179EN. The typical data in this document is valid for the N5290A and these configurations.

A full system calibration and compliance to technical specifications can only be obtained with the five options of the N5290A system. All other configurations will receive individual component functional certifications (typical specifications).

| PNA/PNA-X | Description  |
|-----------|--|
| N5293AX01 | Frequency extender, 110 GHz, 1.2m cable, no bias tee       |
| N5293AX02 | Frequency extender, 110 GHz, 1.2m cable, pulsed bias tee   |
| N5293AX03 | Frequency extender, 110 GHz, 1.2m cable, LFE with bias tee |
| N5293AX51 | Frequency extender, 110 GHz, 1.8m cable, no bias tee       |
| N5293AX52 | Frequency extender, 110 GHz, 1.8m cable, pulsed bias tee   |
| N5293AX53 | Frequency extender, 110 GHz, 1.8m cable, LFE with bias tee |

## Definitions

All specifications and characteristics apply over a  $25^{\circ}\text{C} \pm 5^{\circ}\text{C}$  range (unless otherwise stated) and 90 minutes after the instrument has been turned on.

**Specification (spec.):** Warranted performance. Specifications include guardbands to account for the expected statistical performance distribution, measurement uncertainties, and changes in performance due to environmental conditions.

**Characteristic (char.):** A performance parameter that the product is expected to meet before it leaves the factory, but that is not verified in the field and is not covered by the product warranty. A characteristic includes the same guardbands as a specification.

**Typical (typ.):** Expected performance of an average unit which does not include guardbands. It is not covered by the product warranty.

**Nominal (nom.):** A general, descriptive term that does not imply a level of performance. It is not covered by the product warranty.

**Supplemental performance data (SPD):** A performance parameter that is tested on a minimal set of products during design validation. It does not include guardbands, and is not covered by the product warranty.

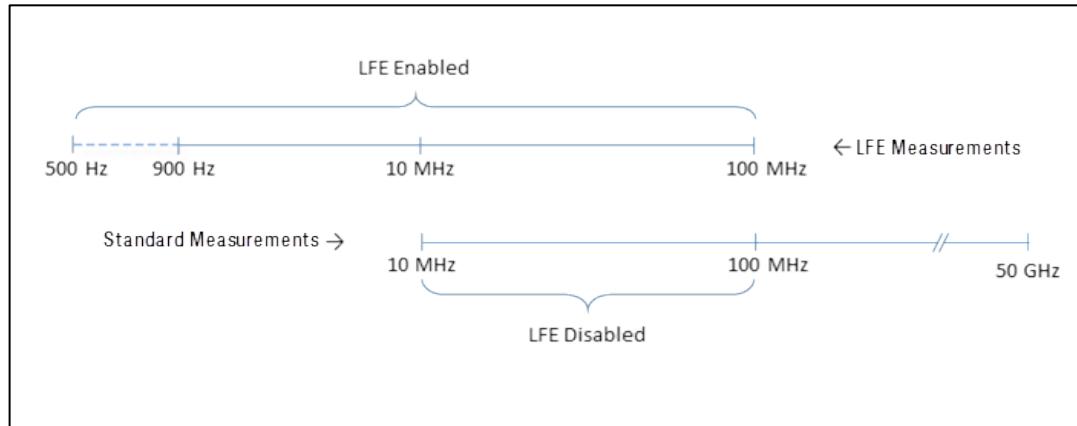

**Calibration:** The process of measuring known standards to characterize a network analyzer's systematic (repeatable) errors.

**Corrected (residual):** Indicates performance after error correction (calibration). It is determined by the quality of calibration standards and how well "known" they are, plus system repeatability, stability, and noise.

**Uncorrected (raw):** Indicates instrument performance without error correction. The uncorrected performance affects the stability of a calibration.

**Standard:** When referring to the analyzer, this includes no options unless noted otherwise.

**Standard and LFE measurements:** With PNA/PNA-X option 205 or 425, which adds Low Frequency Extension (LFE) hardware, the LFE measurement range overlaps with the standard measurement range from 10 MHz to 100 MHz. With LFE Enabled, measurements from 500 Hz to 100 MHz use LFE hardware. With LFE Disabled, measurements from 10 MHz to 100 MHz use standard hardware. To measure below 10 MHz, LFE must be enabled. All measurements above 100 MHz use standard hardware, regardless of the LFE Enabled/Disabled setting.

**Traceability:** Power measurements are traceable to 110 GHz. S-parameters are traceable to 110 GHz.

#### Notes

Please download our free Uncertainty Calculator from [http://www.Keysight.com/find/na\\_calculator](http://www.Keysight.com/find/na_calculator) to generate the curves for your calibration kit and PNA setup.

Typical performance information between 500 Hz and 110 GHz is shown in this document where available.

All data presented is at the test port of the frequency extenders only.

**NOTE**

LFE refers to the Option 205/425 Low Frequency Extension.

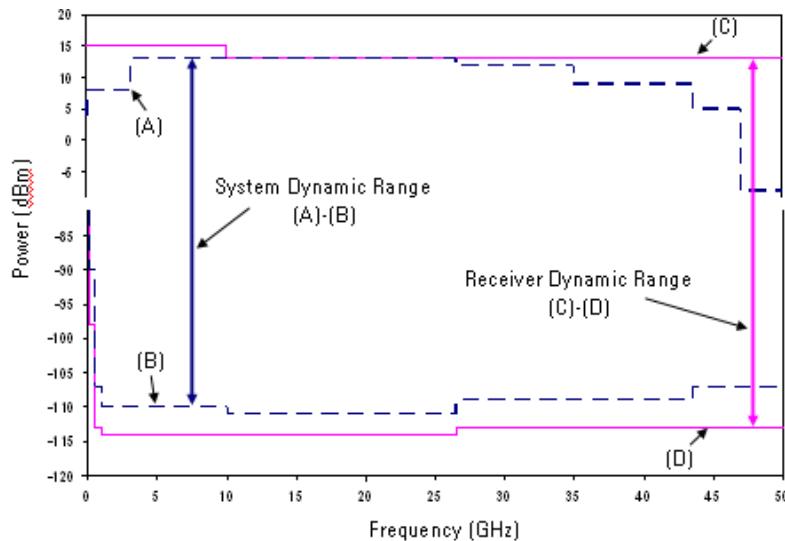

## Dynamic Range

The specifications in this section apply for measurements made with the N5244B and N5245B analyzer with the following conditions:

- 10 Hz IF bandwidth
- No averaging applied to data
- Isolation calibration with an averaging factor of 8
- Source in filtered mode where applicable

**System Dynamic Range** is defined as the measured source maximum output power (A) minus the measured noise floor (B).

**Receiver Dynamic Range** is defined as the typical test port 0.1 dB compression (C) minus the typical noise floor (D).

## System Dynamic Range

Table 1. N5290A System Dynamic Range (dB)

| Description                    | Specification |            | Typical    |            |
|--------------------------------|---------------|------------|------------|------------|
|                                | Ports 1, 3    | Ports 2, 4 | Ports 1, 3 | Ports 2, 4 |
| 10 MHz to 50 MHz <sup>1</sup>  | 67            | 67         | 86         | 85         |
| 50 MHz to 100 MHz <sup>1</sup> | 90            | 90         | 105        | 105        |
| 100 MHz to 500 MHz             | 99            | 99         | 117        | 117        |
| 500 MHz to 1 GHz               | 113           | 113        | 126        | 126        |
| 1 GHz to 2 GHz                 | 121           | 121        | 131        | 131        |
| 2 GHz to 2.5 GHz               | 119           | 121        | 129        | 131        |
| 2.5 GHz to 3.2 GHz             | 119           | 121        | 128        | 131        |
| 3.2 GHz to 5 GHz               | 126           | 125        | 132        | 132        |
| 5 GHz to 8 GHz                 | 123           | 124        | 131        | 130        |
| 8 GHz to 10 GHz                | 123           | 123        | 131        | 130        |
| 10 GHz to 12 GHz               | 122           | 123        | 130        | 129        |
| 12 GHz to 13.5 GHz             | 121           | 121        | 130        | 129        |
| 13.5 GHz to 15 GHz             | 121           | 121        | 130        | 129        |
| 15 GHz to 16 GHz               | 122           | 121        | 130        | 129        |
| 16 GHz to 18 GHz               | 119           | 118        | 128        | 128        |
| 18 GHz to 20 GHz               | 119           | 117        | 128        | 126        |
| 20 GHz to 24 GHz               | 118           | 115        | 128        | 125        |
| 24 GHz to 26.5 GHz             | 121           | 121        | 129        | 129        |
| 26.5 GHz to 30 GHz             | 114           | 114        | 121        | 121        |
| 30 GHz to 35 GHz               | 114           | 114        | 122        | 122        |
| 35 GHz to 40 GHz               | 112           | 112        | 120        | 120        |
| 40 GHz to 45 GHz               | 114           | 114        | 122        | 122        |
| 45 GHz to 50 GHz               | 114           | 114        | 122        | 122        |
| 50 GHz to 52 GHz               | 114           | 113        | 122        | 121        |
| 52 GHz to 60 GHz               | 115           | 115        | 123        | 123        |
| 60 GHz to 64 GHz               | 114           | 114        | 122        | 122        |
| 64 GHz to 67 GHz               | 110           | 110        | 119        | 119        |
| 67 GHz to 70 GHz               | 110           | 110        | 119        | 119        |
| 70 GHz to 75 GHz               | 108           | 108        | 118        | 118        |
| 75 GHz to 80 GHz               | 108           | 108        | 114        | 114        |
| 80 GHz to 85 GHz               | 108           | 108        | 115        | 115        |
| 85 GHz to 90 GHz               | 108           | 108        | 115        | 115        |
| 90 GHz to 95 GHz               | 107           | 107        | 116        | 116        |
| 95 GHz to 100 GHz              | 105           | 105        | 116        | 116        |

| Description        | Specification |     | Typical |     |
|--------------------|---------------|-----|---------|-----|
| 100 GHz to 105 GHz | 103           | 103 | 113     | 113 |
| 105 GHz to 110 GHz | 104           | 104 | 114     | 114 |

<sup>1</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 2.

Table 2. N5290A System Dynamic Range (dB), All Ports (LFE Enabled)

| Description       | Specification |            | Typical    |            |
|-------------------|---------------|------------|------------|------------|
|                   | Ports 1, 3    | Ports 2, 4 | Ports 1, 3 | Ports 2, 4 |
| 500 Hz to 900 Hz  | --            | --         | 97         | 97         |
| 900 Hz to 1 kHz   | 93            | 93         | 103        | 104        |
| 1 kHz to 10 kHz   | 96            | 96         | 104        | 105        |
| 10 kHz to 100 kHz | 111           | 112        | 117        | 117        |
| 100 kHz to 1 MHz  | 115           | 117        | 121        | 122        |
| 1 MHz to 5 MHz    | 115           | 116        | 121        | 121        |
| 5 MHz to 10 MHz   | 105           | 106        | 112        | 112        |
| 10 MHz to 50 MHz  | 99            | 100        | 107        | 107        |
| 50 MHz to 100 MHz | 99            | 100        | 106        | 107        |

## Receiver Dynamic Range

Table 3. N5290A Receiver Dynamic Range (dB)

| Description                    | Typical |
|--------------------------------|---------|
| 10 MHz to 50 MHz <sup>1</sup>  | 92      |
| 50 MHz to 100 MHz <sup>1</sup> | 105     |
| 100 MHz to 500 MHz             | 117     |
| 500 MHz to 1 GHz               | 125     |
| 1 GHz to 2 GHz                 | 128     |
| 2 GHz to 5 GHz                 | 127     |
| 5 GHz to 20 GHz                | 128     |
| 20 GHz to 24 GHz               | 127     |
| 24 GHz to 26.5 GHz             | 128     |
| 26.5 GHz to 32 GHz             | 119     |
| 32 GHz to 40 GHz               | 119     |
| 40 GHz to 50 GHz               | 119     |
| 50 GHz to 60 GHz               | 121     |
| 60 GHz to 64 GHz               | 122     |
| 64 GHz to 67 GHz               | 120     |
| 67 GHz to 70 GHz               | 120     |
| 70 GHz to 75 GHz               | 119     |
| 75 GHz to 80 GHz               | 114     |
| 80 GHz to 90 GHz               | 114     |
| 90 GHz to 95 GHz               | 113     |
| 95 GHz to 100 GHz              | 112     |
| 100 GHz to 105 GHz             | 108     |
| 105 GHz to 110 GHz             | 109     |

<sup>1</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 4.

Table 4. N5290A Receiver Dynamic Range (dB), All Ports (LFE Enabled)

| Description       | Typical |
|-------------------|---------|
| 500 Hz to 900 Hz  | 101     |
| 900 Hz to 1 kHz   | 105     |
| 1 kHz to 10 kHz   | 106     |
| 10 kHz to 100 kHz | 117     |
| 100 kHz to 1 MHz  | 121     |
| 1 MHz to 5 MHz    | 121     |
| 5 MHz to 10 MHz   | 114     |
| 10 MHz to 50 MHz  | 115     |
| 50 MHz to 100 MHz | 115     |

## Corrected System Performance

Applies to the N5290A Option 201, 202, 401, 402, or 403 systems using the 85059B calibration kit. Also applies to the following condition:

Specification are valid for temperatures of  $23^{\circ}\pm3^{\circ}\text{C}$  and  $< 1^{\circ}\text{ C}$  deviation from the calibration temperature.

For any  $S_{ii}$  reflection measurement:

- $S_{jj} = 0$ .

For any  $S_{ij}$  transmission measurement:

- $S_{ji} = S_{ij}$  when  $S_{ij} \leq 1$
- $S_{ji} = 1/S_{ij}$  when  $S_{ij} > 1$
- $S_{kk} = 0$  for all  $k$

Please download our free Uncertainty Calculator from [http://www.keysight.com/find/na\\_calculator](http://www.keysight.com/find/na_calculator) for specifications for other calibration kits and measurement setups.

## N5290A System (10 MHz to 110 GHz) (LFE Disabled)

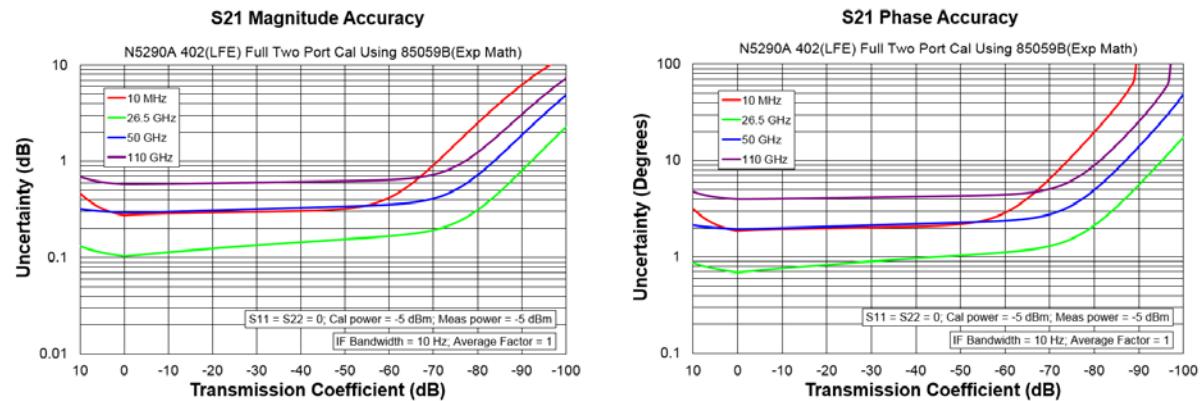

Table 5. Error Terms (dB), All Ports, All Options – Specifications

| Description                    | Directivity | Source Match | Load Match | Transmission Tracking |           | Reflection Tracking |           |
|--------------------------------|-------------|--------------|------------|-----------------------|-----------|---------------------|-----------|
|                                |             |              |            | Mag                   | Phase (°) | Mag                 | Phase (°) |
| 10 MHz to 50 MHz <sup>1</sup>  | 29          | 28           | 29         | ±0.260                | ±1.713    | ±0.020              | ±0.132    |
| 50 MHz to 200 MHz <sup>1</sup> | 29          | 28           | 29         | ±0.236                | ±1.560    | ±0.020              | ±0.132    |
| 200 MHz to 500 MHz             | 29          | 28           | 29         | ±0.242                | ±1.595    | ±0.020              | ±0.132    |
| 500 MHz to 2 GHz               | 29          | 28           | 29         | ±0.248                | ±1.635    | ±0.020              | ±0.132    |
| 2 GHz to 3.2 GHz               | 29          | 28           | 29         | ±0.164                | ±1.081    | ±0.020              | ±0.132    |
| 3.2 GHz to 10 GHz              | 30          | 29           | 29         | ±0.182                | ±1.204    | ±0.055              | ±0.363    |
| 10 GHz to 13.5 GHz             | 31          | 31           | 30         | ±0.155                | ±1.023    | ±0.090              | ±0.594    |
| 13.5 GHz to 16 GHz             | 35          | 35           | 33         | ±0.101                | ±0.667    | ±0.090              | ±0.594    |
| 16 GHz to 20 GHz               | 36          | 35           | 34         | ±0.107                | ±0.708    | ±0.070              | ±0.462    |
| 20 GHz to 24 GHz               | 37          | 36           | 36         | ±0.090                | ±0.595    | ±0.050              | ±0.330    |
| 24 GHz to 26.5 GHz             | 37          | 36           | 36         | ±0.097                | ±0.643    | ±0.050              | ±0.330    |
| 26.5 GHz to 40 GHz             | 35          | 33           | 33         | ±0.189                | ±1.245    | ±0.060              | ±0.396    |
| 40 GHz to 43.5 GHz             | 33          | 32           | 32         | ±0.222                | ±1.463    | ±0.070              | ±0.462    |
| 43.5 GHz to 50 GHz             | 32          | 31           | 31         | ±0.281                | ±1.857    | ±0.075              | ±0.495    |
| 50 GHz to 60 GHz               | 31          | 30           | 29         | ±0.343                | ±2.265    | ±0.115              | ±0.759    |
| 60 GHz to 64 GHz               | 31          | 30           | 29         | ±0.333                | ±2.201    | ±0.150              | ±0.990    |
| 64 GHz to 67 GHz               | 31          | 30           | 28         | ±0.355                | ±2.345    | ±0.150              | ±0.990    |
| 67 GHz to 75 GHz               | 28          | 27           | 26         | ±0.449                | ±2.961    | ±0.150              | ±0.990    |

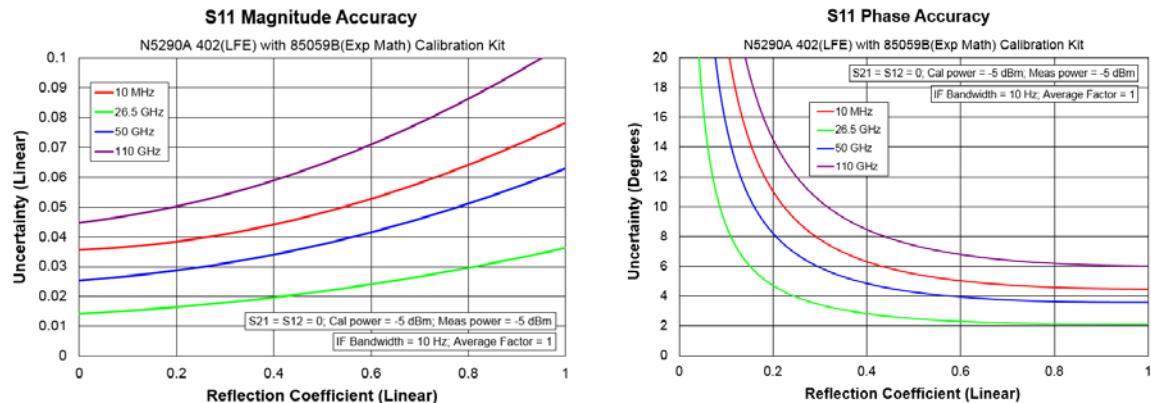

| Description        | Directivity | Source Match | Load Match | Transmission Tracking | Reflection Tracking |
|--------------------|-------------|--------------|------------|-----------------------|---------------------|
| 75 GHz to 100 GHz  | 27          | 27           | 26         | ±0.483                | ±3.190              |
| 100 GHz to 110 GHz | 27          | 27           | 25         | ±0.560                | ±3.693              |

<sup>1</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 6.

| 20 GHz to 24 GHz               | 18          | 19           | 11         | ±1.5                  | ±1.5                | -125      |
| 24 GHz to 26.5 GHz             | 16          | 19           | 10         | ±1.5                  | ±1.5                | -125      |
| 26.5 GHz to 40 GHz             | 11          | 15           | 10         | ±1.5                  | ±1.5                | -119      |
| 40 GHz to 43.5 GHz             | 11          | 10           | 12         | ±1.5                  | ±1.5                | -119      |
| 43.5 GHz to 50 GHz             | 10          | 9            | 10         | ±1.75                 | ±1.5                | -119      |
| 50 GHz to 60 GHz               | 9           | 10           | 10         | ±1.75                 | ±1.5                | -119      |
| 60 GHz to 64 GHz               | 9           | 10           | 11         | ±1.75                 | ±1.5                | -119      |
| 64 GHz to 67 GHz               | 11          | 11           | 10         | ±1.75                 | ±1.5                | -119      |
| 67 GHz to 75 GHz               | 9           | 10           | 11         | ±1.75                 | ±1.5                | -119      |
| 75 GHz to 100 GHz              | 7           | 11           | 11         | ±1.75                 | ±1.5                | -118      |
| 100 GHz to 110 GHz             | 5           | 10           | 9          | ±2                    | ±1.5                | -116      |

<sup>1</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies ≤ 100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance ≤ 100 MHz, see Table 8 and Table 10.

Table 10. Error Terms (dB), All Ports, All Options – Typical (LFE Enabled)

| Description       | Directivity | Source Match | Load Match | Transmission Tracking | Reflection Tracking | Crosstalk |
|-------------------|-------------|--------------|------------|-----------------------|---------------------|-----------|
| 500 Hz to 900 Hz  | -13         | 3            | 3          | ±1.5                  | ±1.5                | -92       |
| 900 Hz to 1 kHz   | -6          | 5            | 6          | ±1.5                  | ±1.5                | -99       |
| 1 kHz to 10 kHz   | -4          | 6            | 6          | ±1.5                  | ±1.5                | -94       |
| 10 kHz to 100 kHz | 15          | 20           | 18         | ±1.5                  | ±1.5                | -99       |
| 100 kHz to 1 MHz  | 15          | 20           | 18         | ±1.5                  | ±1.5                | -116      |
| 1 MHz to 5 MHz    | 11          | 11           | 11         | ±1.5                  | ±1.5                | -117      |
| 5 MHz to 10 MHz   | 2           | 9            | 9          | ±1.5                  | ±1.5                | -111      |
| 10 MHz to 50 MHz  | 2           | 9            | 9          | ±1.5                  | ±1.5                | -105      |
| 50 MHz to 100 MHz | -2          | 9            | 9          | ±1.5                  | ±1.5                | -108      |

## Test Port Output - 500 Hz to 110 GHz

### Maximum Power

Table 11. Test Port Maximum Power<sup>1</sup> (dBm), All Models, All Options

| Description                    | Specification |            | Typical    |            |
|--------------------------------|---------------|------------|------------|------------|
|                                | Ports 1, 3    | Ports 2, 4 | Ports 1, 3 | Ports 2, 4 |
| 10 MHz to 50 MHz <sup>2</sup>  | 0             | 0          | 4          | 3          |
| 50 MHz to 100 MHz <sup>2</sup> | 7             | 7          | 10         | 10         |
| 100 MHz to 500 MHz             | 7             | 7          | 10         | 10         |
| 500 MHz to 1 GHz               | 8             | 8          | 11         | 11         |
| 1 GHz to 2 GHz                 | 10            | 10         | 12         | 12         |
| 2 GHz to 2.5 GHz               | 5             | 7          | 10         | 12         |
| 2.5 GHz to 3.2 GHz             | 5             | 7          | 9          | 12         |
| 3.2 GHz to 5 GHz               | 10            | 9          | 13         | 13         |
| 5 GHz to 8 GHz                 | 7             | 8          | 12         | 12         |
| 8 GHz to 10 GHz                | 7             | 7          | 12         | 11         |
| 10 GHz to 12 GHz               | 6             | 7          | 11         | 10         |
| 12 GHz to 13.5 GHz             | 5             | 5          | 10         | 9          |
| 13.5 GHz to 15 GHz             | 5             | 5          | 10         | 9          |
| 15 GHz to 16 GHz               | 6             | 5          | 10         | 9          |
| 16 GHz to 18 GHz               | 3             | 2          | 8          | 8          |
| 18 GHz to 20 GHz               | 3             | 1          | 8          | 6          |
| 20 GHz to 24 GHz               | 3             | 0          | 8          | 5          |
| 24 GHz to 26.5 GHz             | 6             | 6          | 9          | 9          |
| 26.5 GHz to 30 GHz             | 6             | 6          | 9          | 9          |
| 30 GHz to 35 GHz               | 6             | 6          | 10         | 10         |
| 35 GHz to 40 GHz               | 4             | 4          | 8          | 8          |
| 40 GHz to 45 GHz               | 6             | 6          | 10         | 10         |
| 45 GHz to 50 GHz               | 5             | 5          | 10         | 10         |
| 50 GHz to 52 GHz               | 5             | 4          | 9          | 8          |
| 52 GHz to 60 GHz               | 6             | 6          | 10         | 10         |
| 60 GHz to 64 GHz               | 4             | 4          | 9          | 9          |
| 64 GHz to 67 GHz               | 1             | 1          | 5          | 5          |
| 67 GHz to 70 GHz               | 1             | 1          | 5          | 5          |
| 70 GHz to 75 GHz               | 1             | 1          | 5          | 5          |
| 75 GHz to 80 GHz               | 1             | 1          | 5          | 5          |
| 80 GHz to 85 GHz               | 1             | 1          | 5          | 5          |
| 85 GHz to 90 GHz               | 1             | 1          | 2          | 2          |

| Description        | Specification |   | Typical |   |
|--------------------|---------------|---|---------|---|
| 90 GHz to 95 GHz   | 0             | 0 | 2       | 2 |
| 95 GHz to 100 GHz  | 0             | 0 | 2       | 2 |
| 100 GHz to 105 GHz | 0             | 0 | 2       | 2 |
| 105 GHz to 110 GHz | 0             | 0 | 2       | 2 |

<sup>1</sup> When the N524xB PNA-X is used, the numbers are valid only when the high power mode is selected for the signal source.

<sup>2</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 12.

Table 12. Maximum Power (dBm), All Ports (LFE Enabled)

| Description       | Specification | Typical <sup>1</sup> |
|-------------------|---------------|----------------------|
| 500 Hz to 900 Hz  | --            | 8                    |
| 900 Hz to 1 kHz   | 4             | 11                   |
| 1 kHz to 10 kHz   | 8             | 11                   |
| 10 kHz to 100 kHz | 8             | 12                   |
| 100 kHz to 1 MHz  | 10            | 12                   |
| 1 MHz to 5 MHz    | 7             | 10                   |
| 5 MHz to 10 MHz   | 3             | 8                    |
| 10 MHz to 50 MHz  | 2             | 5                    |
| 50 MHz to 100 MHz | 2             | 5                    |

<sup>1</sup> Values apply to all ports. Ports 2 and 4 typically 1 dB higher.

## Port Power Level Accuracy

Table 13. Port Power Level Accuracy<sup>1</sup> (dB), All Ports, All Options

| Description                    | Typical <sup>1</sup> |
|--------------------------------|----------------------|
| 10 MHz to 50 MHz <sup>2</sup>  | ±0.7                 |
| 50 MHz to 100 MHz <sup>2</sup> | ±0.6                 |
| 100 MHz to 500 MHz             | ±0.7                 |
| 500 MHz to 1 GHz               | ±1.6                 |
| 1 GHz to 2 GHz                 | ±0.6                 |
| 2 GHz to 5 GHz                 | ±0.5                 |
| 5 GHz to 20 GHz                | ±0.7                 |
| 20 GHz to 24 GHz               | ±0.7                 |
| 24 GHz to 26.5 GHz             | ±0.6                 |
| 26.5 GHz to 32 GHz             | ±1.0                 |
| 32 GHz to 40 GHz               | ±1.1                 |
| 40 GHz to 50 GHz               | ±1.0                 |
| 50 GHz to 60 GHz               | ±0.8                 |
| 60 GHz to 67 GHz               | ±1.1                 |
| 67 GHz to 70 GHz               | ±1.0                 |
| 70 GHz to 75 GHz               | ±1.1                 |
| 75 GHz to 80 GHz               | ±1.2                 |
| 80 GHz to 100 GHz              | ±1.5                 |
| 100 GHz to 110 GHz             | ±1.8                 |

<sup>1</sup> Nominal preset power (-5 dBm).

<sup>2</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies ≤ 100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance ≤ 100 MHz, see Table 14.

Table 14. Port Power Level Accuracy<sup>1</sup> (dB), All Ports, All Options (LFE Enabled)

| Description       | Typical   |
|-------------------|-----------|
| 500 Hz to 900 Hz  | $\pm 0.3$ |
| 900 Hz to 1 kHz   | $\pm 0.3$ |
| 1 kHz to 10 kHz   | $\pm 0.3$ |
| 10 kHz to 100 kHz | $\pm 0.3$ |
| 100 kHz to 1 MHz  | $\pm 0.3$ |
| 1 MHz to 5 MHz    | $\pm 0.4$ |
| 5 MHz to 10 MHz   | $\pm 0.4$ |
| 10 MHz to 50 MHz  | $\pm 0.4$ |
| 50 MHz to 100 MHz | $\pm 0.4$ |

<sup>1</sup> Nominal preset power (-5 dBm).

## Port Power Linearity

### NOTE

Port power linearity listed is a receiver based measurement and absolute linearity may be better than shown.

Table 15. Port Power Linearity<sup>1</sup> (dB), All Ports, Option 201, 202, 401, 402, 403

| Description                      | Typical        |
|----------------------------------|----------------|
| -25 dBm to Max Power             |                |
| 10 MHz to 50 MHz <sup>2,3</sup>  | $\leq \pm 0.5$ |
| 50 MHz to 500 MHz <sup>2,3</sup> | $\leq \pm 0.5$ |
| 500 MHz to 1 GHz <sup>2,3</sup>  | $\leq \pm 0.5$ |
| 1 GHz to 2 GHz <sup>2,3</sup>    | $\leq \pm 0.5$ |
| 2 GHz to 24 GHz <sup>2</sup>     | $\leq \pm 0.5$ |
| 24 GHz to 64 GHz                 | $\leq \pm 0.5$ |
| 64 GHz to 110 GHz                | $\leq \pm 0.5$ |

<sup>1</sup> Referenced to nominal power (-5 dBm), from -25 dBm to max power.

<sup>2</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq 100$  MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq 100$  MHz, see Table 16.

<sup>3</sup> For Option 401, 402, 403, Port 1 and Port 3, referenced to nominal power (-5 dBm), from -25 dBm to max power minus 3 dB.

Table 16. Power Level Linearity<sup>1</sup> (dB), All Ports (LFE Enabled)

| Description       | Specification | Typical <sup>1</sup> |
|-------------------|---------------|----------------------|
| 500 Hz to 900 Hz  | --            | ±0.3                 |
| 900 Hz to 1 kHz   | ±1.0          | ±0.2                 |
| 1 kHz to 10 kHz   | ±1.0          | ±0.2                 |
| 10 kHz to 100 kHz | ±1.0          | ±0.2                 |
| 100 kHz to 1 MHz  | ±1.0          | ±0.2                 |
| 1 MHz to 5 MHz    | ±1.0          | ±0.2                 |
| 5 MHz to 10 MHz   | ±1.0          | ±0.2                 |
| 10 MHz to 50 MHz  | ±1.0          | ±0.2                 |
| 50 MHz to 100 MHz | ±1.0          | ±0.3                 |

<sup>1</sup> Referenced to nominal power (-5 dBm), from -25 dBm to max power.

## Port Harmonics

Table 17. Harmonics, All Options – Typical

| Description <sup>1</sup>       | 2nd Harmonic | 3rd Harmonic<br>Ports 1, 3 <sup>2</sup> | 3rd Harmonic<br>Ports 2, 4 <sup>2</sup> |
|--------------------------------|--------------|---|---|
| 10 MHz to 50 MHz <sup>3</sup>  | -20          | -27                                     | -22                                     |
| 50 MHz to 100 MHz <sup>3</sup> | -23          | -27                                     | -23                                     |
| 100 MHz to 500 MHz             | -19          | -27                                     | -23                                     |
| 500 MHz to 1 GHz               | -17          | -32                                     | -23                                     |
| 1 GHz to 2 GHz                 | -20          | -33                                     | -23                                     |
| 2 GHz to 5 GHz                 | -25          | -33                                     | -23                                     |
| 5 GHz to 20 GHz                | -26          | -34                                     | -22                                     |
| 20 GHz to 24 GHz               | -46          | -40                                     | -32                                     |
| 24 GHz to 26.5 GHz             | -42          | -42                                     | -32                                     |
| 26.5 GHz to 32 GHz             | -44          | -61                                     | -32                                     |
| 32 GHz to 40 GHz               | -44          | -61                                     | -45                                     |
| 40 GHz to 50 GHz               | -43          | --                                      | --                                      |
| 50 GHz to 60 GHz               | -42          | --                                      | --                                      |
| 60 GHz to 67 GHz               | -36          | --                                      | --                                      |
| 67 GHz to 70 GHz               | -31          | --                                      | --                                      |
| 70 GHz to 75 GHz               | --           | --                                      | --                                      |

| Description <sup>1</sup> | 2nd Harmonic | 3rd Harmonic<br>Ports 1, 3 <sup>2</sup> | 3rd Harmonic<br>Ports 2, 4 <sup>2</sup> |
|--------------------------|--------------|---|---|
| 75 GHz to 80 GHz         | --           | --                                      | --                                      |
| 80 GHz to 100 GHz        | --           | --                                      | --                                      |
| 100 GHz to 110 GHz       | --           | --                                      | --                                      |

<sup>1</sup> Listed frequency is fundamental frequency; test at max specified power.

<sup>2</sup> Any port can be used as the source port. Source in Filtered mode where applicable.

<sup>3</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 18.

Table 18. 2<sup>nd</sup> and 3<sup>rd</sup> Harmonics at Max Specified Power (dBc), All Ports – Typical (LFE Enabled)

Listed frequency is fundamental frequency; test at max specified power.

| Description       | 2nd Harmonic | 3rd Harmonic |
|-------------------|--------------|--------------|
| 500 Hz to 900 Hz  | -29          | -27          |
| 900 Hz to 1 kHz   | -22          | -23          |
| 1 kHz to 10 kHz   | -22          | -23          |
| 10 kHz to 100 kHz | -22          | -23          |
| 100 kHz to 1 MHz  | -29          | -22          |
| 1 MHz to 5 MHz    | -33          | -26          |
| 5 MHz to 10 MHz   | -26          | -22          |
| 10 MHz to 33 MHz  | -22          | -15          |
| 33 MHz to 50 MHz  | -22          | --           |

## Source Phase Noise

Table 19. Phase Noise (dBc/Hz), All Options – Typical

| CW Frequency | 100 Hz Offset | 1 kHz Offset | 10 kHz Offset | 100 kHz Offset | 1 MHz Offset | 10 MHz Offset |
|--------------|---------------|--------------|---------------|----------------|--------------|---------------|
| 1 GHz        | -94           | -116         | -130          | -141           | -145         | -144          |
| 3 GHz        | -83           | -106         | -119          | -128           | -139         | -147          |
| 10 GHz       | -78           | -100         | -113          | -122           | -133         | -142          |
| 20 GHz       | -72           | -94          | -107          | -116           | -127         | -135          |
| 50 GHz       | -61           | -84          | -98           | -108           | -118         | -126          |
| 60 GHz       | -62           | -84          | -97           | -106           | -117         | -125          |
| 75 GHz       | -60           | -82          | -95           | -104           | -115         | -123          |
| 90 GHz       | -60           | -82          | -95           | -104           | -115         | -123          |
| 110 GHz      | -56           | -78          | -91           | -100           | -111         | -119          |

Table 20. Phase Noise (dBc/Hz), All Ports – Typical (LFE Enabled)

| Description       | 1 kHz Offset | 10 kHz Offset | 100 kHz Offset | 1 MHz Offset |
|-------------------|--------------|---------------|----------------|--------------|
| 500 Hz to 100 MHz | -120         | -130          | -125           | -135         |

## Test Port Input – 500 Hz to 110 GHz

### Noise Floor

Table 21. Test Port Noise Floor (dBm) @ 10 Hz IFBW, All Options

| Description                    | Specification | Typical |
|--------------------------------|---------------|---------|
| 10 MHz to 50 MHz <sup>1</sup>  | -66           | -82     |
| 50 MHz to 100 MHz <sup>1</sup> | -82           | -95     |
| 100 MHz to 500 MHz             | -91           | -107    |
| 500 MHz to 1 GHz               | -104          | -115    |
| 1 GHz to 2 GHz                 | -110          | -119    |
| 2 GHz to 2.5 GHz               | -114          | -119    |
| 2.5 GHz to 3.2 GHz             | -115          | -119    |
| 3.2 GHz to 5 GHz               | -115          | -119    |
| 5 GHz to 8 GHz                 | -115          | -120    |
| 8 GHz to 10 GHz                | -115          | -120    |
| 10 GHz to 12 GHz               | -115          | -120    |
| 12 GHz to 13.5 GHz             | -115          | -120    |
| 13.5 GHz to 15 GHz             | -115          | -120    |
| 15 GHz to 16 GHz               | -115          | -120    |
| 16 GHz to 18 GHz               | -115          | -120    |
| 18 GHz to 20 GHz               | -115          | -120    |
| 20 GHz to 24 GHz               | -113          | -120    |
| 24 GHz to 26.5 GHz             | -113          | -120    |
| 26.5 GHz to 30 GHz             | -107          | -112    |
| 30 GHz to 35 GHz               | -107          | -112    |
| 35 GHz to 40 GHz               | -107          | -112    |
| 40 GHz to 45 GHz               | -107          | -112    |
| 45 GHz to 50 GHz               | -106          | -112    |
| 50 GHz to 60 GHz               | -108          | -113    |
| 60 GHz to 64 GHz               | -108          | -113    |
| 64 GHz to 67 GHz               | -108          | -114    |
| 67 GHz to 70 GHz               | -108          | -114    |
| 70 GHz to 75 GHz               | -105          | -113    |
| 75 GHz to 80 GHz               | -103          | -109    |
| 80 GHz to 85 GHz               | -103          | -110    |
| 85 GHz to 90 GHz               | -103          | -110    |
| 90 GHz to 95 GHz               | -103          | -111    |
| 95 GHz to 100 GHz              | -103          | -110    |

| Description        | Specification | Typical |
|--------------------|---------------|---------|
| 100 GHz to 105 GHz | -100          | -107    |
| 105 GHz to 110 GHz | -101          | -108    |

<sup>1</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 22.

Table 22. Test Port Noise Floor (dBm) @ 10 Hz IFBW, All Options (LFE Enabled)

| Description       | Specification | Typical |
|-------------------|---------------|---------|
| 500 Hz to 900 Hz  | --            | -88     |
| 900 Hz to 1 kHz   | -84           | -92     |
| 1 kHz to 10 kHz   | -85           | -93     |
| 10 kHz to 100 kHz | -98           | -104    |
| 100 kHz to 1 MHz  | -102          | -108    |
| 1 MHz to 5 MHz    | -103          | -110    |
| 5 MHz to 10 MHz   | -95           | -101    |
| 10 MHz to 50 MHz  | -95           | -101    |
| 50 MHz to 100 MHz | -95           | -101    |

## Trace Noise

Table 23. Trace Noise, Magnitude (dB rms), All Options

| Description                    | Specification | Typical    |            |              |              |
|--------------------------------|---------------|------------|------------|--------------|--------------|

| 20 GHz to 24 GHz               | +5                    |                      | 0.05           | 0.4             |
| 24 GHz to 26.5 GHz             | +5                    |                      | 0.05           | 0.4             |
| 26.5 GHz to 32 GHz             | +5                    |                      | 0.05           | 0.4             |
| 32 GHz to 40 GHz               | +5                    |                      | 0.05           | 0.4             |
| 40 GHz to 50 GHz               | +5                    |                      | 0.05           | 0.4             |
| 50 GHz to 60 GHz               | +5                    |                      | 0.05           | 0.4             |
| 60 GHz to 64 GHz               | +5                    |                      | 0.05           | 0.4             |
| 64 GHz to 67 GHz               | +5                    |                      | 0.05           | 0.4             |
| 67 GHz to 70 GHz               | +5                    |                      | 0.09           | 1.1             |
| 70 GHz to 75 GHz               | +5                    |                      | 0.09           | 1.1             |
| 75 GHz to 80 GHz               | +5                    |                      | 0.10           | 1.2             |
| 80 GHz to 90 GHz               | +5                    |                      | 0.16           | 2.0             |
| 90 GHz to 100 GHz              | 0                     |                      | 0.17           | 2.0             |
| 100 GHz to 110 GHz             | 0                     |                      | 0.17           | 2.0             |

<sup>1</sup> Data represents the transmission compression with a negligible level of compression in the Reference Receivers.

<sup>2</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 28.

Table 28. Compression, All Ports (LFE Enabled) - Typical

| Description       | Test Port Power (dBm) | Receiver Compression |                |
|-------------------|-----------------------|----------------------|----------------|
|                   |                       | All Options          | Magnitude (dB) |
| 500 Hz to 900 Hz  | 4                     |                      | 0.13           |
| 900 Hz to 1 kHz   | 4                     |                      | 0.09           |
| 1 kHz to 10 kHz   | 8                     |                      | 0.06           |
| 10 kHz to 100 kHz | 8                     |                      | 0.06           |
| 100 kHz to 1 MHz  | 10                    |                      | 0.03           |
| 1 MHz to 5 MHz    | 7                     |                      | 0.04           |
| 5 MHz to 10 MHz   | 3                     |                      | 0.03           |
| 10 MHz to 50 MHz  | 3                     |                      | 0.03           |
| 50 MHz to 100 MHz | 3                     |                      | 0.02           |

Table 29. 0.1 dB Compression, All Options, All Ports - Typical

| Description                    | Test Port Power (dBm) |
|--------------------------------|-----------------------|
| 10 MHz to 50 MHz <sup>1</sup>  | 10                    |
| 50 MHz to 100 MHz <sup>1</sup> | 10                    |
| 100 MHz to 500 MHz             | 10                    |
| 500 MHz to 1 GHz               | 10                    |
| 1 GHz to 2 GHz                 | 9                     |
| 2 GHz to 5 GHz                 | 8                     |
| 5 GHz to 10 GHz                | 8                     |
| 10 GHz to 20 GHz               | 8                     |
| 20 GHz to 24 GHz               | 7                     |
| 24 GHz to 26.5 GHz             | 8                     |
| 26.5 GHz to 32 GHz             | 7                     |
| 32 GHz to 40 GHz               | 7                     |
| 40 GHz to 50 GHz               | 7                     |
| 50 GHz to 60 GHz               | 8                     |
| 60 GHz to 64 GHz               | 9                     |
| 64 GHz to 67 GHz               | 6                     |
| 67 GHz to 70 GHz               | 6                     |
| 70 GHz to 75 GHz               | 6                     |
| 75 GHz to 80 GHz               | 5                     |
| 80 GHz to 90 GHz               | 4                     |
| 90 GHz to 100 GHz              | 2                     |
| 100 GHz to 110 GHz             | 1                     |

<sup>1</sup> With PNA/PNA-X Option 205 or 425 installed and LFE disabled, applied to frequencies  $\leq$  100 MHz. Above 100 MHz, performance is the same for both LFE enabled or disabled. For LFE enabled performance  $\leq$  100 MHz, see Table 30.

Table 30. 0.1 dB Compression, All Ports, All Options (LFE Enabled) - Typical

| Description       | Test Port Power (dBm) |
|-------------------|-----------------------|
| 500 Hz to 900 Hz  | 13                    |
| 900 Hz to 1 kHz   | 13                    |
| 1 kHz to 10 kHz   | 13                    |
| 10 kHz to 100 kHz | 13                    |
| 100 kHz to 1 MHz  | 13                    |
| 1 MHz to 5 MHz    | 11                    |
| 5 MHz to 10 MHz   | 13                    |
| 10 MHz to 50 MHz  | 14                    |
| 50 MHz to 100 MHz | 14                    |

## Damage Input Level

Table 31. Damage Input Level, All Options

| Description | 1 mm Test Port |        | BNC Bias Port |                 |
|-------------|----------------|--------|---------------|-----------------|
|             | RF (dBm)       | DC (V) | DC (V)        | Max Current (A) |
| All Options | >20            | >50    | >50           | >1              |

## Bias Tee Leakage Current

Table 32. Leakage Current (Average Typical)

| Description     |        |
|-----------------|--------|
| Leakage Current | <18 nA |

### NOTE

Leakage current measured with test port open circuit and is typical.

### NOTE

When using the bias-tees on N5293AX03/53 frequency extender modules, users may see errors for measurements below 100 MHz. This is due to the interaction between the built-in LFE bias combiner and the output match of the DC-bias supply being used.

## Dynamic Accuracy

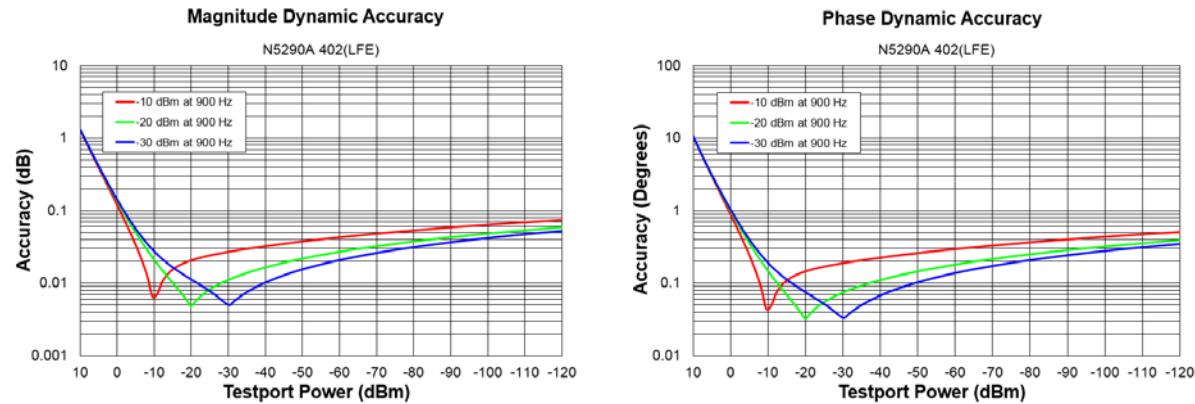

Dynamic accuracy is verified with the following measurements:

- Compression over frequency.
- IF linearity at a single frequency of 99.6 MHz using a reference level of -20 dBm for an input power range of +4 to -55 dBm.

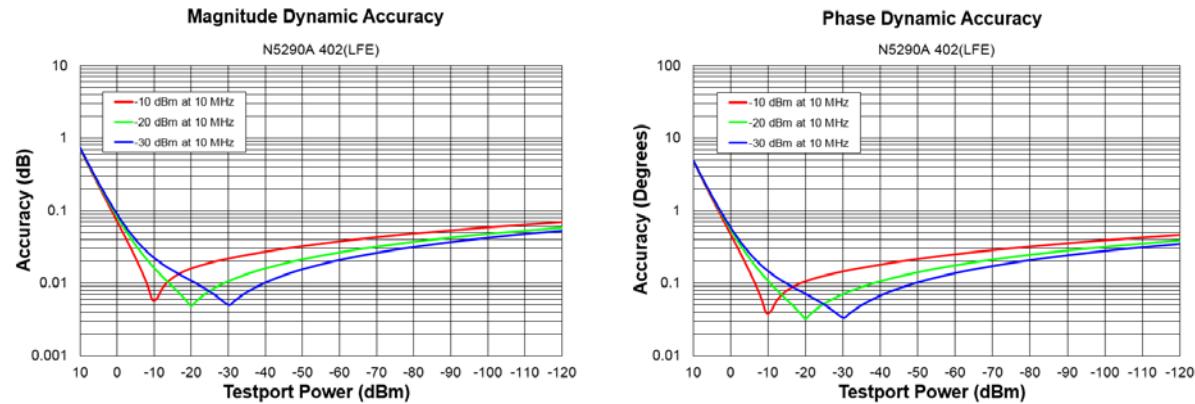

For values below -55 dBm, refer to "[VNA Receiver Dynamic Accuracy Specifications and Uncertainties](#)".

## Group Delay - Typical

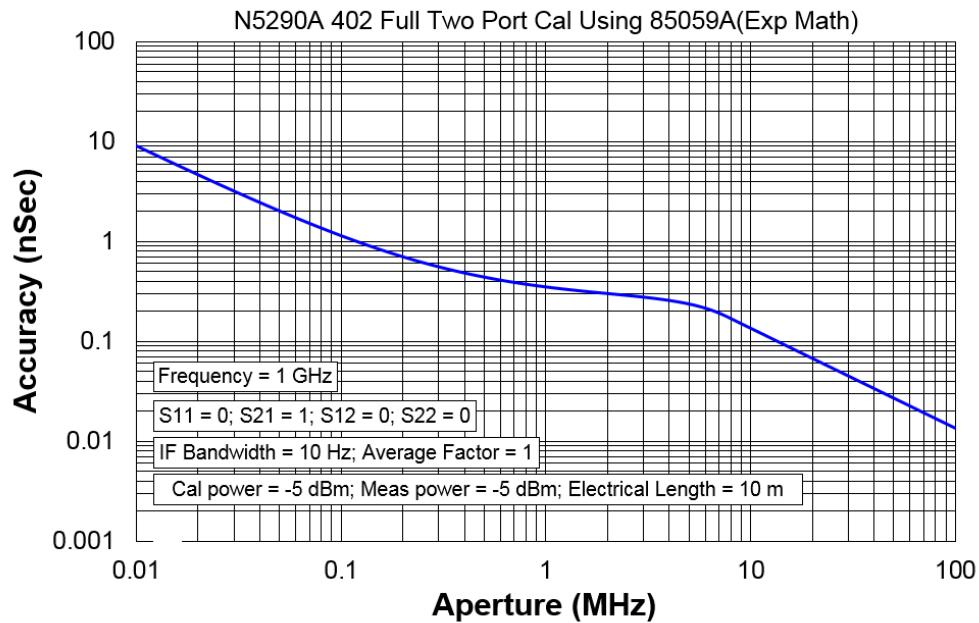

Table 34. Test Port Input (Group Delay)<sup>1</sup>

| Description           | Typical Performance  |
|-----------------------|--|
| Aperture (selectable) | (frequency span)/(number of points -1)   |
| Maximum Aperture      | 20% of frequency span  |
| Range                 | 0.5 x (1/minimum aperture)   |
| Maximum Delay         | Limited to measuring no more than 180° of phase change within the minimum aperture.) |
| Accuracy              | See graph below. Char.   |

The following graph shows characteristic group delay accuracy with full 2-port calibration and a 10 Hz IF bandwidth. Insertion loss is assumed to be < 2 dB and electrical length to be ten meters.

For any  $S_{ij}$  Group Delay measurement,  $S_{ii} = 0$ ,  $S_{ij} = 1$ ,  $S_{ji} = 0$ ,  $S_{kl} = 0$  for all  $kl \neq ij$

### Group Delay Accuracy (Typical)

In general, the following formula can be used to determine the accuracy, in seconds, of specific group delay measurement:

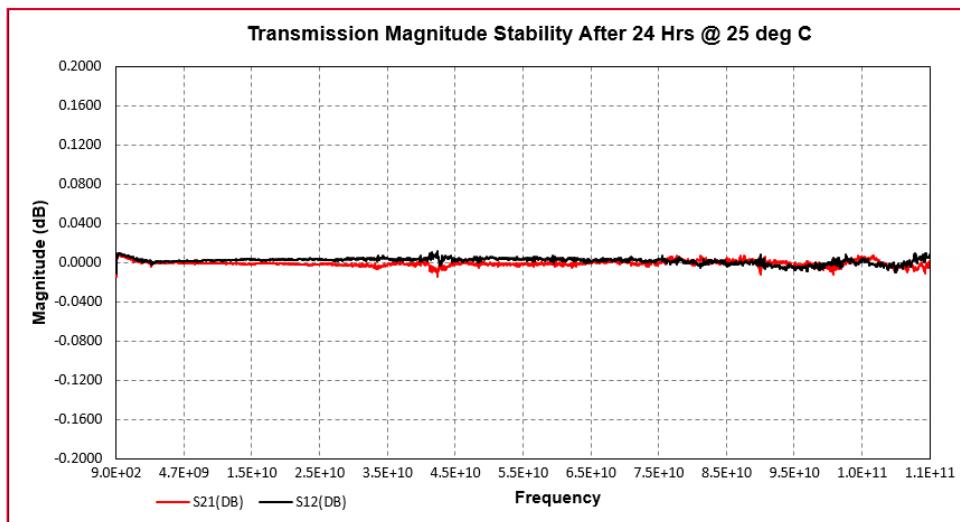

$\pm \text{Phase Accuracy (deg)} / [360 \times \text{Aperture (Hz)}]$

Depending on the aperture and device length, the phase accuracy used is either incremental phase accuracy or worst-case phase accuracy.

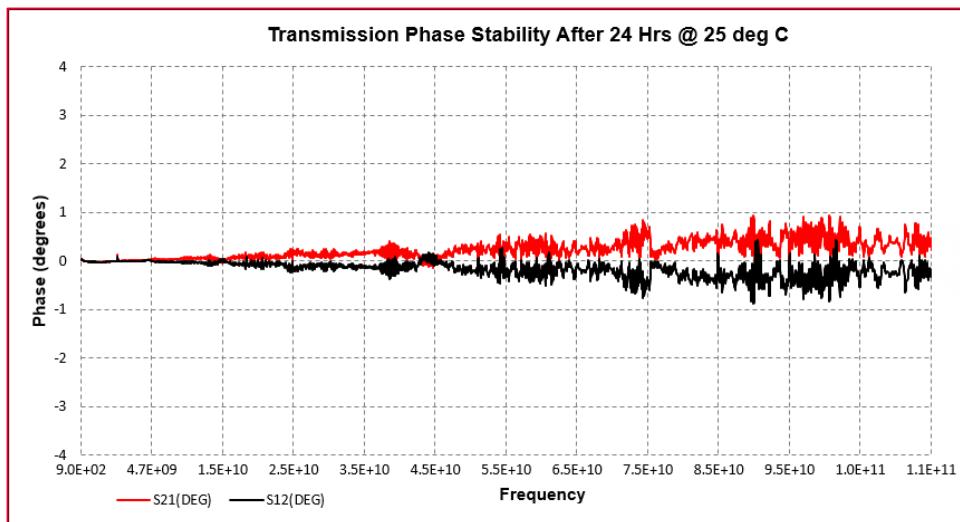

<sup>1</sup> Group delay is computed by measuring the phase change within a specified frequency step (determined by the frequency span and the number of points per sweep).

## N5290A Stability

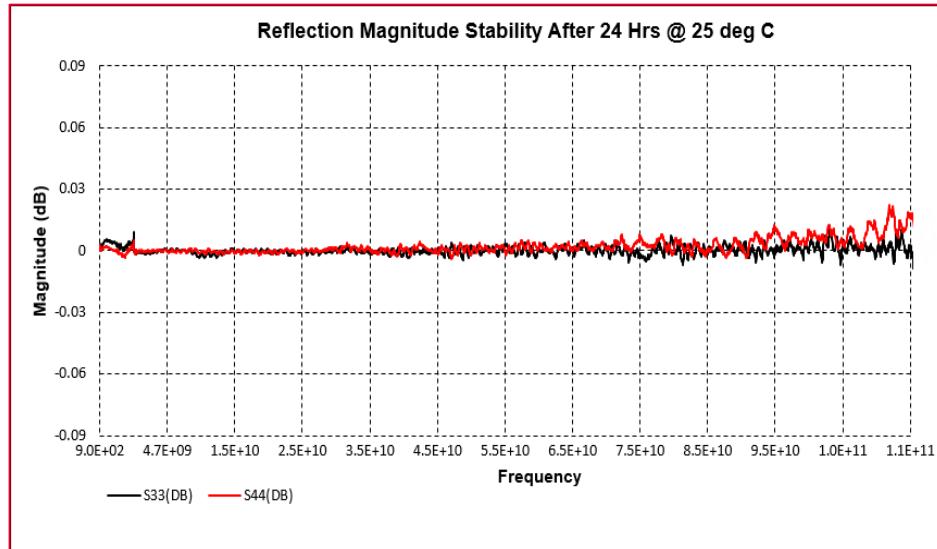

Transmission Magnitude Stability (Nominal)

Transmission Phase Stability (Nominal)

### Reflection Magnitude Stability (Nominal)

### Reflection Phase Stability (Nominal)

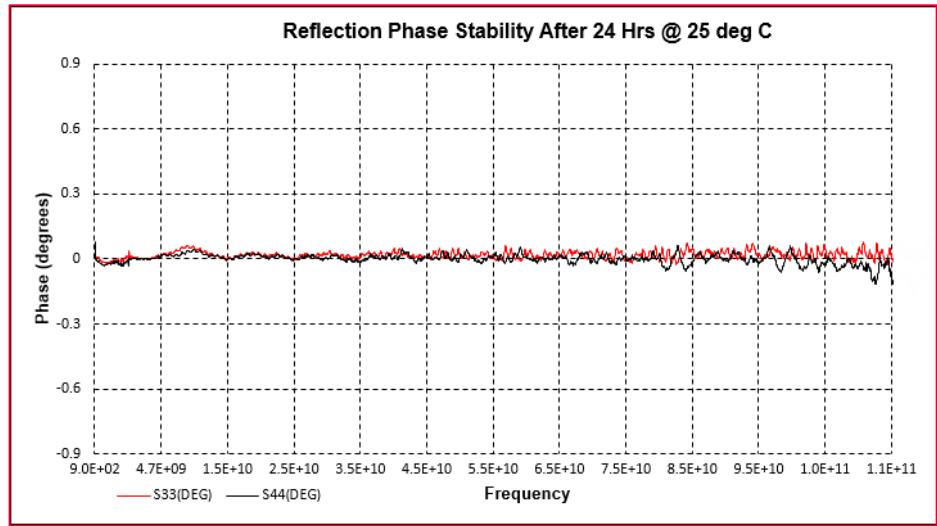

Table 35. N5290A Stability – Typical (10 MHz to 110 GHz) (LFE Disabled)

| Description       | Magnitude (dB/°C) | Phase (°/°C) |
|-------------------|-------------------|--------------|
| 10 MHz to 2.5 GHz | 0.01              | 0.02         |
| 2.5 GHz to 24 GHz | 0.01              | 0.03         |
| 24 GHz to 54 GHz  | 0.01              | 0.10         |
| 54 GHz to 80 GHz  | 0.01              | 0.20         |
| 80 GHz to 110 GHz | 0.015             | 0.25         |

Table 36. Receiver Stability (LFE Enabled) - Typical

| Description       | Magnitude (dB/°C) | Phase (°/°C) |
|-------------------|-------------------|--------------|
| 500 Hz to 900 Hz  | 0.015             | 0.15         |
| 900 Hz to 1 kHz   | 0.015             | 0.15         |
| 1 kHz to 10 kHz   | 0.015             | 0.15         |
| 10 kHz to 100 kHz | 0.015             | 0.15         |
| 100 kHz to 1 MHz  | 0.015             | 0.15         |
| 1 MHz to 5 MHz    | 0.03              | 0.3          |
| 5 MHz to 10 MHz   | 0.1               | 0.3          |
| 10 MHz to 50 MHz  | 0.1               | 0.3          |
| 50 MHz to 100 MHz | 0.1               | 0.55         |

## General Information

| <b>Line Power</b>  |   |   |
| Frequency, Voltage | 50/60/400 Hz for 100 to 120 VAC<br>50/60 Hz for 220 to 240 VAC  |   |
|                    | Power supply is auto switching  |   |
| Max                | 575 watts   |   |

<sup>1</sup> High power devices require external power supply.

## System Dimensions and Weight

For System Dimensions and Weight, refer to the N5290A System Installation Manual, located online at <http://literature.cdn.Keysight.com/litweb/pdf/N5292-90002.pdf>.

## Regulatory and Environmental Information

For Regulatory and Environmental information, refer to the PNA Series Installation and Quick Start Guide, located online at <http://literature.cdn.keysight.com/litweb/pdf/E8356-90001.pdf>.

## Measurement Throughput Summary

Cycle time Includes sweep time, retrace time and band-crossing time. Analyzer display turned off with DISPLAY:ENABLE OFF. Add 21 ms for display on. Data for one trace (S11) measurement. LF Auto BW off.

Table 43. Cycle Time (ms) for Measurement Completion, All Models, All Options - Typical

| Sweep Range        | IF Bandwidth <sup>1</sup> |             | Number of Points |       |       |        |        |
|--------------------|---------------------------|-------------|------------------|-------|-------|--------|--------|
|                    |                           |             | 201              | 401   | 1601  | 16001  | 32001  |
| 50 kHz to 100 MHz  | 10 kHz                    | Uncorrected | 75               | 141   | 515   | 4726   | 9243   |
|                    |                           | 2-Port cal  | 155              | 285   | 1050  | 9505   | 18440  |
|                    | 1 kHz                     | Uncorrected | 306              | 599   | 2339  | 23000  | 46003  |
|                    |                           | 2-Port cal  | 611              | 1200  | 4715  | 46185  | 91960  |
|                    | 100 Hz                    | Uncorrected | 2543             | 5085  | 20293 | 202691 | 405085 |

<sup>1</sup> Automatic IF reduction turned on.

Table 44. Cycle Time vs. IF Bandwidth - Typical

Applies to the **Preset condition** (201 points, correction off) except for the following changes:

- CF = 10 GHz
- Span = 100 MHz
- Display off (add 21 ms for display on)

Cycle time includes sweep and retrace time.

| Description       |  | N5290A          |                                |
|-------------------|--|-----------------|--------------------------------|
| IF Bandwidth (Hz) |  | Cycle Time (ms) | Trace Noise Magnitude (dB rms) |
| 10 Hz             |  | 17832           | 0.18                           |
| 100 Hz            |  | 1824            | 0.18                           |
| 1 kHz             |  | 227             | 0.18                           |
| 10 kHz            |  | 67              | 0.18                           |
| 100 kHz           |  | 49              | 0.18                           |

Table 45. Cycle Time (ms) vs. Number of Points - Typical

Applies to the **Preset condition** (correction off) except for the following changes:

- CF = 10 GHz
- Span = 100 MHz
- Display off (add 21 ms for display on)

Cycle time includes sweep and retrace time.

| Description      | IF Bandwidth (Hz) |       |        |         |
|------------------|-------------------|-------|--------|---------|
| Number of Points | 100               | 1,000 | 10,000 | 100,000 |
| Cycle Time (ms)  |                   |       |        |         |
| 51               | 478               | 72    | 29     | 25      |
| 201              | 1832              | 230   | 67     | 49      |
| 401              | 3652              | 455   | 125    | 80      |
| 1601             | 14476             | 1719  | 402    | 250     |
| 16001            | 144285            | 16582 | 3418   | 2000    |
| 32001            | 288242            | 33043 | 6614   | 3742    |

Table 46. Data Transfer Time<sup>1</sup> (ms) - Typical

**NOTE**

The following was measured on a unit with Synthesizer 6.

| Description   | Number of Points |      |      |        |        |
|---|------------------|------|------|--------|--------|
|   | 201              | 401  | 1601 | 16,001 | 32,001 |
| SCPI over GPIB (Program executed on external PC <sup>2</sup> )                      |                  |      |      |        |        |
| 32-bit floating point   | 4.6              | 9.3  | 38   | 352    | 720    |
| 64-bit floating point   | 9.4              | 18.8 | 73.4 | 730    | 1455   |
| ASCII   | 36.7             | 72.5 | 288  | 2882   | 5762   |
| SCPI over SICL/LAN or TCP/IP Socket <sup>3</sup> (Program executed in the analyzer) |                  |      |      |        |        |
| 32-bit floating point   | <1               | <1   | <1   | 1.2    | 2.4    |
| 64-bit floating point   | <1               | <1   | <1   | 2.3    | 4.6    |
| ASCII   | 2.1              | 4    | 15   | 148    | 295    |
| COM <sup>1</sup> (Program executed in the analyzer)                                 |                  |      |      |        |        |
| 32-bit floating point   | <1               | <1   | <1   | <1     | <1     |
| Variant type  | <1               | <1   | 1.4  | 12.4   | 25.5   |
| DCOM over LAN <sup>3</sup> (Program executed on external PC)                        |                  |      |      |        |        |
| 32-bit floating point   | <1               | <1   | <1   | 2.3    | 4.4    |
| Variant type  | <1               | 1.6  | 5.3  | 52     | 105.5  |

<sup>1</sup> Measured with the analyzer display off. Values will increase slightly if the analyzer display is on.

<sup>2</sup> Measured when using the SCPI command DISPLAY:VISible OFF.

<sup>3</sup> Values are for real and imaginary pairs, with the analyzer display off, using Gigabit Ethernet.

## Test Set Block Diagrams

**NOTE**

For best readability, use a color printer for printing the following graphics.
